

# Faulkner Hospital

Watertown, Massachusetts

Architectural detail, color, and texture helped create the appealing building envelope on this four story addition to the Faulkner Hospital.

A total of 250 pieces of the architectural precast / prestressed concrete column covers, window and spandrel panels outline the large units of glass curtain wall. The curved front face and sun screen canopy on the ground level coupled with the projected roof line gives a beautiful architectural profile to the structure.

Architects: **Tsoi / Kobus & Associates** - Cambridge, MA

Engineer: **McNamara / Salvia Inc.** - Boston, MA

Construction Manager: **Kennedy & Rossi** - Lexington, MA
