

International Cargo Center

Boston, Massachusetts

The International Cargo Center of New England

facility, located on Drydock Avenue in South Boston, consists of a warehouse and two office buildings totaling nearly 314,000 square feet of floor space. A joint venture between **Boston Freight Terminal and Cargo Ventures, LLC.**, the facility will handle more than 110 million pounds of imported cargo and 50 million pounds of exported cargo per year. The new center increases by 50 percent the amount of square footage used for international operations by Boston Freight Terminal on the 9.5-acre site, but will triple the company's capacity because it will be more efficient

The new buildings feature 26-foot-high ceilings, open floor space for heavy loads, and loading docks. Strescon Limited produced and erected 240 pieces of 6" thick precast concrete wall panels on the office buildings and 150 pieces of 10" thick insulated wall panels on the warehouse building. The panels had a combination of light and medium sandblasted finish to its light grey color. In total, the precast concrete wall panels amounted to over 64,000 square feet. The panels were erected in the Fall of 2006.

Project: **International Cargo Center • Boston, MA** Structural Consultants: **LeMessurier Consultants • Cambridge, MA**
Architects: **Corgan Associates • New York, NY** Construction Manager: **R.F. Walsh Company, Inc. • Boston, MA**
